

Meet the Coaches

With their low tuition rates and open-door enrollment policies, community colleges have long been a way for students of all socioeconomic backgrounds to pursue higher education and career advancement. However, students experiencing poverty often face challenges that go beyond paying for school. Financial hardship can turn anything from transportation to Internet access into a potential obstacle that could derail a student's plans.

That's why Clark College recently hired four new Resource Coaches to help students remain successful and supported all the way through their educational journey. The coaches were hired through a Working Families Success Network grant announced earlier this year, with supplementation from a grant from the Community Foundation of Southwest Washington, and are part of a collegewide effort to improve Clark's support and

understanding of students in poverty.

“We want these coaches to be a resource not just for our students, but for our employees as well,” said Associate Director of Workforce Education Services Armetta Burney. “Our hope is that, when staff or faculty encounter a student who seems to be overwhelmed by poverty-related challenges, they’ll know that they can refer the student to one of our coaches for help.”

According to most-recent data, almost half of Clark’s students are low-income, and almost three-quarters of them are first-generation students. These students may lack stable housing or a quiet place to study. They may have difficulty affording basic school supplies, or child care, or transportation to and from school. Additionally, college can feel very lonely for these students. Because they’re the first to attend college, they may not feel like they can turn to their family or friends for support or advice; meanwhile, they may feel alienated from classmates and faculty who don’t understand the unique challenges they face.

These four new Resource Coaches are meant to change that dynamic. Now, when a student is making the transition from basic education courses to credit-bearing college ones, they’ll have support from a Transitional Studies Coach during the process. When they’re struggling to afford housing or food, the Workforce Education Services Coach can help them apply for public benefits and connect with community organizations. If college becomes overwhelming and their grades begin to slip, the Retention and Career Coach can help them get back on track. And if they find their finances stretched thin, the Financial Literacy Coach can help them set up a budget and figure out strategies to make the most out of their financial resources.

While many of these services have been available at the college in different forms, the coaches add a personal

relationship that can help keep at-risk students from slipping through the cracks.

“We almost never talk to a student just once,” explains Transitional Studies Coach Nicole Hopkins. “After we meet with a student, we call them back. And I will call them again and again if I have to: ‘Hey, how are you doing? Are you working on that plan we figured out for you?’ I am happy to walk students across the street to someone’s office if I think they need more help after our meeting.”

Additionally, the Resource Coaches serve as advocates to the rest of the college, sharing their students’ perspectives and working to make Clark a more inclusive environment. They offer workshops to Clark faculty and staff on how to communicate with students experiencing poverty, including one held during the college’s first-ever Teaching and Learning Days in August. The additional grant from the Community Foundation of Southwest Washington funds the Financial Literacy Coach’s work teaching workshops on financial resources and skills to students in order to help break the cycle of intergenerational poverty.

“We want to help remove the stigma and misperceptions about poverty, both here at Clark and within our broader community,” says Director of Career Services Edie Blakley. “We see it as part of the college’s role as a learning institution.”

Meet the Coaches

Nicole, Transitional Studies Coach

Nicole works with students enrolled in Clark's Transitional Studies program—which includes English as a Second Language, Adult High School Diploma, and GED Preparation—as they transfer into credit-bearing courses at the college. When students come in to meet her, she helps them assess which resources they have, and which they lack, to succeed at Clark. She discusses their personal and educational goals and helps them identify potential barriers, connecting them to resources that might help diminish those barriers. Often she guides them through options like I-BEST and Learning Communities that could help them enter college successfully. And she helps them with college logistics like testing and registration.

Nicole calls her job “exciting and inspiring,” adding, “each one of us has our own story, and it is my privilege to be a part of someone’s story. I get the opportunity to help students move past the barriers on their journey toward success and the best part is, I get to celebrate with them as they reach each goal.”

Contact: TBG 209; M-F 8 a.m. – 4:30 p.m.; nhopkins@clark.edu

Angelica, Workforce Education Services Coach

Angelica works primarily with students enrolled in Workforce Education programs, which help low-income and unemployed individuals earn vocational/technical degrees and certificates. She helps guide these students through college processes, from applying for financial aid to setting up their student email. With years of experience working with people experiencing poverty, she can help connect students to support services both inside and outside the college so they can focus on their education.

“My position excites me because I am able to provide information to students about resources that they may not have been aware of,” Angelica says. “I love to see students grow and develop into professionals as they complete their degrees at Clark. I have been able to build lasting relationships with students that go beyond degree attainment.”

Contact: GHL 128; T 9 a.m. – 5 p.m., W 9 a.m. – 2 p.m., Th 9 a.m. – 1:30 p.m.; WESCoach@clark.edu

Craig, Financial Literacy Coach

Attending college brings with it a whole slew of financial challenges. For a person who's used to living paycheck to paycheck, receiving a quarter's worth of financial aid at one time can be difficult to manage. Books, fees, and equipment can cost hundreds of dollars. Craig's job is to help students manage their budgets and avoid common pitfalls. He helps them check their credit scores and shop for the best bank or credit card to fit their needs. He works with them to develop plans to work through any debt or financial challenges they currently have, as well as long-term plans to help them create a solid financial foundation from which to build. Additionally, Craig regularly holds workshops on financial literacy through the Career Center and the Library.

"I enjoy helping students understand how to make money work for them, thereby bringing them closer to attaining their dreams," he says.

Contact: PUB 002; M-F 9 a.m. – 5 p.m.; cebersole@clark.edu

Alex, Retention & Career Coach

Most students come to Alex for one of two reasons: Either they're not sure where they want to go, or they've hit a stumbling block on the road to get there. Alex helps students explore careers and academic fields that fit their skills and interests, and then create a plan to reach their chosen goal. Additionally, she helps students whose grades have triggered an Academic Early Warning, helping them take the steps they need to get their grades back on track without jeopardizing their financial aid. She takes a holistic look at their lives, helping connect them with services that can help them with not just their academic challenges but their personal ones as well.

"I think being a former Clark student myself helps me understand what these students are going through," says Alex, who earned her associate degree in 2009 before transferring to Portland State University for her bachelor's. "What excites me about this position is the opportunity to support students in accessing and using relevant campus and community resources, help prioritize their success and set strong, personalized goals, and ultimately tie these skills to their future career goals."

The heroes' journeys

Clark College's 2014-2015 Exceptional Faculty Award recipients are, *clockwise from top left*, Steven Clark (biology), Alison Dolder (bakery), Michiyo Okuhara (Japanese), and Matthew Gallaher (English).

An interesting pattern emerged while interviewing the recipients of the 2014 -2015 Clark College Exceptional Faculty Awards: In each case, when the faculty member was asked how they came to teach at Clark, he or she would grin, look into the distance, and say something along the lines of, "Well,

it's kind of a funny story..."

The details of each "funny story" varied: They meant to become zoologists, but wound up teaching baking. They meant to teach at a four-year university—or at a grade school—but wound up teaching at community college. They meant to teach English in Japan, but wound up teaching Japanese in the U.S. But no matter how each journey began, it arrived at the same place: Somehow, their passion drew them to Clark College, and once they were here, they'd found their home. All four of these faculty members radiate a love of their subject matter and their work. Small wonder, then, that students responded by nominating them for this award, which was announced during the college's 2015 Commencement ceremony and officially presented during Opening Day activities on Sept. 14.

The Clark College Exceptional Faculty Awards are presented annually to full-time and part-time faculty members. This year the award recipients include two full-time tenured professors and two part-time adjunct instructors, whose detailed biographies can be accessed through the links below:

- Steven Clark: The naturalist
- Alison Dolder: The tough-but-caring technician
- Matthew Gallaher: The voice of encouragement
- Michiyo Okuhara: The cultural ambassador

The awards are made possible through an endowed trust fund established in 1993 by the Washington State Legislature and the Clark College Exceptional Faculty Endowment Fund. That fund provides recognition of exemplary work performance, positive impact on students, professional commitment, and other contributions to the college. Nominations can be submitted by Clark College students, faculty, classified employees, administrators, alumni, Board members, and Foundation directors.

Exceptional Faculty Award spotlight: The cultural ambassador

Professor Michiyo Okuhara helps members of the Japanese Club teach children in Clark's Child & Family Studies program about kimono in advance of the 2014 Sakura Festival.

Professor Michiyo Okuhara is well aware that students who enroll in her Japanese courses probably have a limited understanding of her home country's culture.

"They see it in pop culture—*anime*, *manga*, Hello Kitty—or sometimes traditional things like samurai," she says. "In

class we don't focus on animation or comic books. We try to inspire them to learn the language, but also a more complete sense of Japanese culture."

Ironically, for someone who now teaches Japanese, Okuhara originally came to the United States to learn English. "I studied English in Japan, but I wanted to use it and live it," she explains. She earned her master's degree at Portland State University, also getting a certificate to teach Japanese as a foreign language from that institution, and in 1999 began teaching at Clark.

"At the time, the program was very small," she remembers. "I had four classes a year, just Japanese 101 to 103."

Today, thanks largely to Okuhara's efforts, Clark offers two years of Japanese study. The college's Japanese Club, which Okuhara helped found, is a vibrant and visible presence on the main campus. Okuhara has also been a key organizer of the college's annual Sakura Festival, and has helped incorporate children from the college's Child and Family Studies (CFS) program into the event—something she started after her own son, Anthony, graduated from the program's daycare. (Okuhara's daughter, Sakura, also has a Clark connection, having earned her associate here before transferring to Western Washington University.)

Okuhara, who received tenure in 2013, says she appreciates the partnerships she's been able to develop at Clark. "We have great colleagues, great collaboration," she says. "Like with CFS, and also International Programs are a great support for us. Or when we had a Japanese theater troupe visiting and needed a performance space; [drama professor] Gene Biby offered to let us use his stage. We're a small department, but

with other people's help, we can do things we cannot do alone."

This year, Okuhara received 2014-2015 Exceptional Faculty Award. "This instructor goes above and beyond, helping students outside of class and outside of her office hours," wrote one student in her nomination. "She not only teaches the language, but she puts forth an extra energy to relate our lessons to Japanese culture. Her knowledge is not only shared to the class, but to the Clark community as well."

Many of Okuhara's former students return during Sakura to visit "Okuhara-sensei," as they call her. Others write her from Japan to tell her about working there. Okuhara cherishes those stories, but feels that teaching world languages helps students even if they never leave their hometown.

"Not everyone gets to major in Japanese or work in Japan," she says. "But part of what they learn is empathy for other cultures, and maybe patience with people from other countries who don't speak English. I really enjoy seeing students learn. When they say Japanese is fun—that's what I hope for."

**Exceptional Faculty Award
spotlight: The tough-but-**

caring technician

Bakery instructor Alison Dolder shows off some of her students' work.

Alison Dolder has got to have, hands-down, the best-smelling classroom at Clark College. The Bakery instructor and interim department head spends much of her time guiding students as they work in the program's lab, which is also a fully functional bakery. Racks of pie shells and biscuits stand by the doorway, and the air is thick with the aromas of butter and sugar. Students in chef's whites stand at tables, making croissants and baguettes to be sold in the college's retail bakery in Gaiser Hall.

"The training here is very different from some culinary schools," says Dolder. "Our students come in, and the very first day they're put in their station and they're forming, they're cutting—everything they'll be doing for the next two

weeks till they switch stations. It's as close to a production bakery as we can get. When they get out and enter the job market, they don't require as much training [as other new graduates] because they're used to the fast pace. They're ready to jump right in."

It's that combination of practicality and enthusiasm—combined with empathy and support—that prompted students to nominate Dolder for the 2014-2015 Exceptional Faculty Award. "I joined the baking program on a whim and it has come to be the greatest decision of my life," wrote one student in her nomination. "I feel like I can be not only the best baker or the best businesswoman around, but I can be the best of myself at all times, and for that I am grateful. Ms. Alison is so encouraging at times, she is tough at times, she is compassionate at times, and she can challenge you daily."

Dolder encourages her students to express their creativity, whether it's through experimenting with whole-wheat croissant dough or

designing a
steampunk-inspired
layer cake.

Dolder came to baking almost by accident. She'd started college as a zoology major, but didn't enjoy the math and chemistry courses and decided to leave school to regroup. "My husband was going to school full-time and working full-time, and so just as something to do, I took a cake-decorating class," she says. "It turns out I was really good at it."

Dolder worked in bakeries and taught cake decoration for more than a decade before deciding to return to school to learn her craft in-depth. Ironically, what appealed to her most was the chemistry involved. "I love how you can take all these ingredients and turn them into something else, something delicious," she says.

Dolder graduated from Clark's bakery program in 2000 and quickly landed a job at the nationally known Pearl Bakery in Portland. But while she loved the work, she realized it wasn't compatible with having two young children. "I was really lucky to work with [former Pearl head baker and current Little T owner] Tim Healea, but it was 9 p.m. to 5 a.m.," she says. When a teaching position opened up at Clark, she decided to apply.

Dolder makes sure her students understand the realities of life as a professional baker. "I tell them, 'Don't believe everything you see on TV,'" she says. "You know, there's that illusion that 'I'm going to start baking cakes and get my own show and be famous.' Baking is hard work."

Dolder is happy to have returned to Clark to share her love and knowledge of baking with today's students. She's looking forward to doing so in the college's soon-to-be-remodeled Culinary Arts wing. "It's so exciting," she says. "I'm looking forward to introducing a new cohort model for our program in a

shiny new facility.” A shiny new facility that, in short order, will probably once again turn into the best-smelling classroom on campus.

Exceptional Faculty Award spotlight: The voice of encouragement

English instructor Matthew Gallaher.

Matthew Gallaher's English Composition is winding down for the day. "If you have any last-minute questions, I'll stick around," the instructor tells his students, who are broken up into groups to "workshop" their papers with their classmates.

Gallaher sits down near one slump-shouldered student. "How are you doing?" he asks the student. "Do you have questions?"

"No," sighs the student. "I just wish I had more time."

"You *do* have time," Gallaher responds with a smile. He points to the student's paper. "This is only a first draft. You're still going to do a second draft, and then revise it again before handing it in. Don't give up on this!"

Imagine every possible permutation of the word "encourage," and it shows up in students' nominations of Gallaher for the 2014-2015 Exceptional Faculty Award, along with words like "fun," "sincere," and "enthusiasm."

"The largest impact that Matthew has had on his students, and on me personally, is his ability to make students feel important, and that their individual success is valuable," reads one. "He goes above and beyond to help others, and is encouraging to his students to continue to develop and share their skills."

Gallaher's enthusiasm and support led him to be recruited as advisor for Alpha Sigma Phi, the Clark College chapter of the international honor society Phi Theta Kappa that blends academic achievement with public service. After two years in that position, Gallaher is stepping down to focus on teaching, but he says he enjoyed mentoring students as they developed new ways to help their community, including annual food drives and a campaign to reduce and reuse electronic waste.

“I was in Boy Scouts as a kid and an Eagle Scout, and it kind of reminded me of that,” says Gallaher, who earned Phi Theta Kappa’s Paragon Award for New Advisors in 2013.

Much of Gallaher’s work at Clark contains echoes of his early years. “My whole family got their associate degrees,” he says. “My parents both came from working class families and could never have afforded college without community college. I went to community college as a high school student, St. Petersburg College in South Florida.”

Gallaher, who earned his bachelor’s degree from University of South Florida and his master’s in English from Portland State University, says he appreciates the diversity of students he encounters teaching at a community college. “You never know what kind of students you’re going to have,” he says. “There are vets from the last two conflicts, and there are students who have only been in this country a few months. There are older students and students who are still in high school. You get all these people together, and they don’t agree almost ever, and it’s kind of great to hear them get riled up as they hear opinions and viewpoints they’ve never been exposed to before.”

Gallaher says he was honored to discover students had nominated him for the award, especially because he is an adjunct instructor, teaching part-time at Clark and part-time at Portland Community College. “It was surprising and humbling,” he says. “Being an adjunct can be lonely. You don’t quite feel part of the community. Phi Theta Kappa really helped me feel more a part of Clark. And now this is just another way of saying, ‘Hey, you love Clark—and Clark loves you, too.’ That feels good.”

Exceptional Faculty Award spotlight: The naturalist

Biology professor Steven Clark in his office.

Steven Clark's office is full of animals. There's the "Cats Against the Bomb" calendar; the poster of the grizzly bear; the woodblock print of a turtle; the vintage Audubon Society birdwatching chart; photos of bees, rodents, spiders, his dogs. The effect is something like walking into a natural history museum that's been shoved into a filing cabinet.

"This room is reflective of my interests," says Clark, glancing over at an illustration of wildflowers above his desk. And, indeed, a conversation with Clark is likely to take

you through the intricacies of parasitic wasps, the difficulties involved in attaching radio monitors to pond turtles, and a startlingly accurate imitation of a pika—a small, rabbit-like creature whose populations in the Columbia Gorge Clark has been helping to monitor for years.

It's hard not to look around this room and assume that Clark was destined to be a biology professor. But Clark, who received his Master of Special Education for the Hearing Impaired from Lewis & Clark College in 1986, began his career teaching almost everything *but* biology at the Washington School for the Deaf.

"I was attracted to the idea of teaching an underserved population," he says. Eventually, however, Clark found himself drawn to the sciences, and in 2000 he left the School for the Deaf to pursue a master's degree in Environmental Sciences and Resources at Portland State University. For four years, he worked as a field biologist for the Washington Department of Fish and Wildlife while also teaching mathematics and biology at Clark as an adjunct instructor.

For Clark, teaching at a community college still fulfills that urge to help underserved populations. "There are great teachers at all colleges, I know that, but I think the mission of the community college—to teach the rank and file of our community—I like that," he says. "My mother never got to go to college. But I used to think that if my mom *had* gone to college, she would have gone to a community college."

Professor Clark at a STEM demonstration in 2015.

Clark, who received tenure in 2014, currently teaches the biology sequence for life sciences majors, a three-quarter series that has earned a reputation as a daunting academic challenge.

“It’s funny, because I think of myself as a warm person, but I know my class is often perceived as ... rigorous,” Clark says, smiling and pausing as he searches for the right word. “I think some students get nervous at first when I explain the work load. But the reason I talk about it from the very beginning is that I want them to understand what they’re getting into. I invite students from the past year to talk about what worked in getting them to be successful. I’ll tell students to show me their notes so I can see where they’re missing something. And you know, I think by the middle of winter quarter, their [study] habits have gotten better and they’re starting to have fun.”

Clark’s theory is backed up by the many students who nominated him for a 2014-2015 Exceptional Faculty Award. “Biology may very well be the study of life, but without an enthusiastic instructor it can seem completely lifeless,” reads one nomination. “Steven Clark has somehow managed to maintain a strict and efficient authority over his classroom, while also making it incredibly fun and intriguing. I can honestly say that I have never seen those two concepts, authority and fun, incorporated into a class so well together. ... He truly cares

for his students, that is abundantly apparent.”

For Clark, his classes’ rigor is one of the ways he shows that he cares. “I like my students to know that they did all their hard stuff at community college, where the focus is on teaching and the tuition is lower and there’s more room to recover from mistakes,” he says. “The best thing for me is when former students email me and say, ‘I’m at Washington State University right now, and me and the other Clark students are in the top tier.’”

A springboard to opportunity

Three Clark College Transitional Studies students celebrate earning their high school diplomas during Clark's 2015 Commencement ceremony. Beginning in the 2015 summer quarter, students like them have a new option for earning their diploma called High School 21+.

Starting this summer quarter, adults in Southwest Washington who lack a high school diploma have a new, streamlined way to earn this valuable educational achievement. Clark College has adopted High School 21+, a new program in Washington State that is designed to help adults gain the education they need to participate in today's workforce.

"There are so many adults who are afraid of returning to school or who are worried about the GED exam and that stands in their way of defining and reaching their goals," said Monica Wilson, Transitional Studies Program Manager. "High School 21+ gives adults a new pathway to meet their goals with additional supports from the Transitional Studies team to help make the process as easy as possible."

High School 21+, which was launched in 2014 in 12 community and technical colleges by the Washington State Board for Community and Technical Colleges, is open to all Washington residents aged 21 or older who do not have a high school degree. While students have always been able to earn high school diplomas or prepare for the GED through two-year colleges, this new program helps remove some obstacles to the process. Students can earn credit for skills gained through work or military history, helping to reduce the amount of time spent in classes that are unnecessary. Also, the program infuses basic skills classes—things like computer skills or writing that students often need to take, but that previously did not apply toward their high school credential—with rigorous academic coursework, allowing them to apply toward a diploma.

According to the U.S. Census, 10 percent of Washington State adults (defined as 25 years or older) do not have a high school degree. Meanwhile, according to recent studies, more than two-thirds of all jobs in Washington State will require postsecondary education by 2018—the sixth-highest rate in the nation.

High School 21+ is designed to make earning a high school diploma more accessible. Classes cost \$25 a quarter and books are provided for no additional charge; classes are offered at two locations, during times that fit working adults' schedules. And, because federal regulations now require a high school diploma or equivalency to receive financial aid, High School 21+ makes college more accessible as well for thousands of Washington State residents.

Clark College's Department of Transitional Studies launched High School 21+ in the 2015 summer quarter with 41 students enrolled. Already, five of them are expected to earn their high school degrees in fall quarter.

Sharing their voices

The Clark College Concert Choir visits the University of Southern California's Thornton School of Music in 2015, where they performed for Dr. Christian Grasses, *center, blue shirt*, the conductor of the school's concert choir. *Photo: April Duvic.*

Traditionally, the week after spring quarter ends is a time for students to rest and recover from the academic year. But not for the members of the Clark College Concert Choir, who

spent four days performing and learning during an end-of-the-year trip to Los Angeles.

The trip, whose destination changes each year, is an annual tradition—a time for choir members to show off what they've learned over the past year and to get a chance to experience performing in front of new audiences. Last year, students traveled to New York to perform near the grounds of the former World Trade Center; the year before that, they visited San Francisco together with the Clark College Concert Band. This year the choir traveled by themselves. The trip, which is funded in part through the Associated Students of Clark College and in part through private fundraising by participating students, ran from June 21 to June 24.

The choir performed three concerts while in Los Angeles, the first of which was in the afternoon on the day they arrived. It was a community service outreach at the Los Angeles Veterans Administration Hospital and Care Facility, providing a Father's Day concert for residents and their families and the staff at the hospital.

"The response from those in attendance was wonderful – the vets really appreciated having the choir perform," said choir director April Duvic. "The students made such an amazing connection after they sang by going out into the audience and talking with the residents who attended the concert. It was life-changing for our students who had never had the opportunity to reach out and connect with vets like that before."

The choir also visited the University of Southern California's Thornton School of Music for a two-hour clinic with Dr. Christian Grases, the conductor of that school's concert choir and an assistant professor in its department of choral and sacred music. They performed the Venezuelan folk song "Mata del Anima Sola" for him, in honor of Dr. Grases' home country.

“Dr. Grases was able to impart incredible knowledge and really fire the choir up,” Duvic said. “He was amazed that the choir was from a two-year college. He enthusiastically invited the Clark College Concert Choir students to consider applying to USC and auditioning for the music department.”

The third and final official concert of the trip was hosted by All Saints’ Episcopal Church in East Los Angeles. The performance was attended by the church’s youth group and many members of the congregation and neighborhood, as well as by three Clark College alumni who live in the city. After the concert the youth group had an opportunity to talk with choir members about attending college and about the various educational plans the Clark students are pursuing.

“It was a positive experience for the Clark students to be able to talk about their college experience and encourage the church’s youth to go to college,” said Duvic. “The applause and standing ovation the choir received was a great way to end our tour.”

Emergency Drill on Main Campus

Clark College and the Vancouver Police Department will conduct a joint training exercise around the Health Sciences Building on Clark College's main campus on August 26.

On Wednesday, August 26, from 7:30 a.m. to 3:30 p.m., individuals on or near the Clark College main campus will notice a high level of police activity as Clark College partners with the Vancouver Police Department on a joint exercise.

During the exercise, the Health Sciences Building and the Brown Parking Lot will be closed. There will be a high concentration of police activity in the area as the groups work together on a daylong scenario.

This exercise builds on the college's ongoing security efforts and helps strengthen ties with the Vancouver Police Department. In preparation for the exercises, the VPD is reaching out to affected neighborhoods, and on campus the college is making sure that all groups affected are informed in advance of the event.

There will be no live weapons used in the drills, nor will there be unusual amounts of noise or simulated explosions.

Most individuals should not be affected other than seeing an unusually high number of VPD officers.

This drill is intended to help both the college and the police improve their emergency response procedures.

Clark College's main campus is located at 1933 Fort Vancouver Way. The Brown Lot and Health Sciences Building are located in the northeast corner of the campus, south of Water Works Park and east of E. Reserve St. at E. 18th St.

Clark Adopts the Gold Standard

Clark's efforts to conserve water during a statewide drought have led to the grass looking a little more parched than usual.

This summer, visitors to the main campus may have noticed a change in its normally lush landscape. The grass, which usually blankets the campus in emerald green, has been looking a little, well, *thirsty* of late. Dry. Brown. Dead, possibly?

Far from it, assures Clark College Director of Facilities Services Tim Petta. He explains that the college is simply responding to Washington Governor Jay Inslee's May 15 declaration of a statewide drought.

"Clark College is doing its part to reduce irrigation use to the least amount of water possible during this difficult water resource time," says Petta. "We are trying different shortened watering schedules to use the least amount of water, while still keeping the grass alive."

According to the Washington Department of Ecology, almost 80 percent of the state's rivers and streams are running at below-normal levels—and 38 percent of them at record lows. Meanwhile, mountain snowpacks are down to 16 percent of their normal levels, and the Washington Department of Agriculture is projecting a \$1.2 billion crop loss this year as a result of the drought.

While the college does not rely on a municipal source for irrigation water, it does pull that water from an underground aquifer that is also used to provide municipal water locally. So the college decided to do what it could to slow its drain on a community resource, says Petta.

The irrigation changes should not affect the college's landmark arboretum, which has earned the college Tree Campus USA status from the Arbor Day Foundation for five years in a row. Trees' deep roots can withstand drought better than smaller, more delicate plants.

Nor will the changes prevent the college's beloved Andersen Fountain from flowing again in a few weeks once scheduled repairs have been made to it. The fountain operates on a

“closed loop” system that recycles the water, meaning it can continue to surprise guests and delight children without affecting the state’s limited water reserves.
