Aukusitino "A.J." Ah-Yek was recently named the first recipient of the newly created Sigma Scholarship, awarded by the Clark College Mathematics Department to support and encourage students who are traditionally underrepresented in STEM fields to pursue higher-level mathematics. "Thanks to generous donations from many of you in our college community, we are awarding AJ \$1500 to go towards his future education," wrote mathematics professor Kayoko Barnhill in an email to college employees today.

Ah-Yek enrolled at Clark College as a Running Start student, initially undecided about his degree path. Soon after finishing his pre-calculus courses, he became a math tutor and eventually an engineering and writing tutor. Throughout his time at Clark, he has played in the college's Jazz Band and also participated in engineering competitions at the college. After graduating this spring with his Associate in Science – Transfer Track 2 degree, he plans to transfer to WSU Pullman to major in mechanical engineering and minor in mathematics. His career focus is in Aerospace Engineering.

"On behalf of the Tutoring Services Team, I would like to let the scholarship committee know that they definitely got the right candidate when they picked A.J. for this," wrote

Tutoring Services Program Manager Janice Taylor. “A.J. is not only an academic rising star, but he is also a rock star in Tutoring Services! He is not afraid to set high goals and he will achieve every single one of them in the shortest time possible. AJ has been an invaluable member of our team and a great resource for his fellow peers at Clark College, we are excited and sad to see him head off to Pullman.”

## A remarkable journey

Evans Kaame

This year's recipient of the Community College President's Award in Honor of Val Ogden is Evans Kaame, a student who has been through much and traveled far to pursue his educational dreams.

## About Evans Kaame

Evans Kaame was born and raised in a small community in northwestern Kenya. After his father died, the family was thrown into hardship and poverty. “I watched my younger

siblings crying as my mom left early in the morning and came home at 9 p.m.," he recalled. "We didn't know if we were going to eat at night or not."

When Kaame was in his early teens, he decided to leave home and live on the streets to ease the burden on his mother and siblings. "The street was a new life with so many barriers ... but because tragedies happen in life, I had to do this," he said. "I had no other option. I fought cold nights in the street ... being on drugs and breaking into people's homes. I had to survive. I had no choice."

In 2009, the course of Kaame's life changed once again, when a charity called New Hope Children entered him into its program providing housing and education to street children. At New Hope, Kaame's academic potential became realized. He graduated from high school in 2016 at the top of his class. However, his challenges were not yet over: He could not afford to enroll in college in Kenya.

New Hope's founder, Rachael Swanson, lives in Vancouver and graduated from Clark College. She encouraged Kaame to apply to Clark, and in 2018, after securing a student visa and scholarship funding from Clark College Foundation, Kaame enrolled at Clark as an international student.

Kaame has thrived at Clark College. This past academic year, he has served as student government president. He has run on the college's track-and-field and cross-country teams. He has volunteered with multiple local organizations, as well as at Clark College's Penguin Pantry and as a Peer Mentor for international students. And he has earned a Grade Point Average of more than 3.9 while doing so.

After graduating from Clark College with his transfer Associate in Arts degree, Kaame intends to continue his studies, focusing on business administration, political

science, and comparative religious studies. He hopes to one day create a global initiative focused on leadership and management.

## **About the Community College President's Award**

The Community College President's Award in honor of Val Ogden is given each year to a student who has completed their studies at Clark College and is transferring to Washington State University Vancouver. They receive full tuition and fees for two years while they finish their bachelor's degree at WSU Vancouver. The award is traditionally announced during that year's Commencement ceremony.

---

## **A night of triumphs**

A record 835 students participated in Clark College's 83rd Commencement Ceremony. Clark College/Nick Bremer

*"Hola, soy Denisse, hoy sere su enfermera,"* read the elaborate script on the top of Denisse

Zuniga-Ibarra's graduation cap, below a cluster of silk flowers. Or, in

English: *"Hello, I'm Denisse, today I'll be your nurse."*

Zuniga-Ibarra was one of 835 graduates waiting in line to enter Sleep Country Amphitheater for Clark College's 2019 commencement ceremony—and each one, it seemed, had their own story to tell of perseverance and triumph.

Dennise Zuniga-Ibarra, far left, with Estefania Tran and Osmara Robles, all nursing graduates. Clark College/Jenny Shadley

"Graduation, to me, means a new job, a new beginning, making my parents proud and giving back to my community," said Zuniga-Ibarra, who was receiving her Associate in Arts degree in Nursing.

Almost 2,500 degrees and certificates were conferred on graduates in the 2018-2019 academic year—a record number for the college. It included the first graduates of the Clark's new Cuisine Management program, as well as of the college's Bachelor of Applied Science in Applied Management (BASAM) degree program.

Bachelor of Applied Science in Applied Management graduates holding a photo collage of their classmate Debbie Terry. *Clark College/Jenny Shadley*

For the BASAM graduates, the event was bittersweet—one member of their cohort, Debbie Terry, died before she could receive her degree. Her classmates held a poster with pictures of her as they waited in the white robes reserved for bachelor's-degree graduates. During the ceremony, Terry's daughter, Melanie Carter, would be the first person to cross the stage, receiving her mother's degree post-humously.

Amanda Rath was one of 126 students earning their high school diploma or GED this year. *Clark College/Hannah Erickson*

Family featured strongly in many graduates' stories. For Amanda Rath, this night wasn't about making her parents proud, but rather, her own four children, aged 3 to 13. All of them would be watching their mother walk across the stage to receive her high school diploma, which she earned through the college's Transitional Studies department.

"I want to provide something more for my children to see in the future—something more than just working at a call center," said the single mother, who works full-time and is already enrolled to begin the pre-nursing program at Clark. "I knew that started with pursuing an education."

Brian Ford Jr. graduated with an Applied Technology degree in Diesel Technology. *Clark College/Nick Bremer*

Like Rath, Brian Ford Jr. had balanced work, life, and school responsibilities. He was graduating with an Associate in Applied Technology degree in Diesel Technology. “It’s been a long journey—three years,” he said. “I had two kids while I was in school. I worked full-time. But I made it. It’s the biggest accomplishment of my life and I’m so happy to get to this day.”

Board of Trustees Chair Jane Jacobsen addresses the class of 2019. *Clark College/Nick Bremer*

Once the bagpipes started and the lines of robed figures filed into the amphitheater, the moments of triumph continued.

“Keep going,” Trustee

Chair Jane Jacobsen told the graduates in her remarks during the ceremony. “This world needs you.”

Jacobsen also pointed out that this ceremony would be the last one to be presided over by Clark College President Bob Knight, who

announced in January announce that he would be retiring after 13 years as the college’s president. She thanked him for his service.

Student speaker Soukaina Ouahhabi. *Clark College/Nick Bremer*

Student speaker Soukaina Ouahhabi spoke of the challenges she had faced as a non-native English speaker studying computer science who also worked full-time. “Sometimes, I would have to choose which I needed to do most: eat, sleep or do homework,” she said. “Because I only had time to do one of them. I’m sure many of you can relate.”

Still, Ouahhabi said, she kept her focus on achieving her goals. “My desire to reach my goals was stronger than the struggles I faced and has pushed me to be the strong, smart woman I am today,” she said, to a roar of applause from her classmates.

Vita Blanco learns she is the 2019 recipient of the Community College Presidents' Scholarship. *Clark College/Nick Bremer*

There was also applause for the award recipients announced during the ceremony. This included the 2018-2019 Exceptional Faculty Award winners, as well as the 2019-2020 Community College Presidents' Scholarship, which was given to Esmeralda "Vita" Blanco. Another finalist for the scholarship, Anastasiya Kozlovska, received a \$1,000 scholarship as well.

Keynote speaker Julianna Marler with President Bob Knight.  
*Clark College/Jenny Shadley*

Keynote speaker Julianna Marler, who is a Clark College alumna, spoke of her journey from being the daughter of Hungarian immigrants to the first female CEO of the Port of Vancouver USA. “Clark College was a foundation of my business knowledge,” she said, adding that even some of her electives, like psychology, wound up being unexpectedly useful in management. “I wouldn’t have guessed it at the time, but those lessons would turn out to serve me well.”

As Knight concluded the ceremony, he told the graduates, “We are excited to think of the ways in which you will change the world. And we are glad to know that Clark College will always hold a special place in your

hearts.”

## A student leader with community roots

Grace Moe is congratulated by President Bob Knight at the 2018 Commencement ceremony.

This year’s recipient of the Community College Presidents’ Award in Honor of Val Ogden was Grace Moe, who graduated with an Associate of Arts transfer degree. “She has shown an exemplary work ethic, participating in student government and volunteering with community organizations while maintaining a

high GPA,” said Clark College President Robert K. Knight in announcing the scholarship during the college’s 2018 Commencement ceremony.

Moe came to Clark College through the Running Start program, which allows high school students to earn college credit. A first-generation college student, Moe has excelled at Clark, serving as the president of the Associated Students of Clark College (student government) and earning a cumulative GPA of 3.82. In addition, she has volunteered with Friends of Trees, the Clark County Food Bank, and New Heights Church.

Moe, 17, says that this scholarship will allow her to complete her bachelor’s degree in finance and marketing in two years, when she will be 19 years old; because her parents are unable to financially contribute to her college tuition, without the scholarship she would have had to attend WSUV part-time in order to earn enough to cover the costs. After earning her bachelor’s degree, she intends to spend a year volunteering with her church before beginning a career at a local business.

“My roots are definitely ingrained in this area,” said Moe, who has lived in Vancouver her whole life. “I plan to give back to the community that raised me, by working in the area so that I can continue to volunteer and serve for Vancouver.”

Because Moe was already sitting on stage during the Commencement ceremony in her capacity as ASCC president, Knight invited her to the podium as he announced the scholarship. “You’ve been a wonderful leader and I know we’re going to hear a lot more about you,” he said.

# “I want to be a role model”

Nicholas Freese '17 waits in line to participate in commencement.

When Nicholas Freese heard his name announced as the recipient of the Community College Presidents' Scholarship in Honor of Val Ogden, there was one person he wanted to discuss it with, above all others: his 4-year-old daughter, Sadie.

“I really want to know what my daughter thinks about this,” he said as he stood in line to receive his degree, clearly still stunned by the news that he would be able to attend Washington State University Vancouver for two years, tuition-free, in order to complete his bachelor's degree. Clark College President Bob Knight made the announcement during the 2017

Clark College Commencement ceremony.

Nicholas Freese stands, stunned, as he learns that he has received the 2017-2018 Community College Presidents' Scholarship.

It might seem strange to want to know a toddler's opinion on your academic achievements, but for Freese, Sadie has been at the heart of his pursuit of higher education. "With her, I have the opportunity to be awesome, just from the get-go," he said during an interview prior to Commencement. "She can just think of Daddy as this great guy who's worked hard and pursued his goals."

Freese is painfully aware that many people who have known him since his own childhood might not see him in such an unambiguously positive light. Growing up in Albuquerque, New Mexico, Freese began getting into trouble around the time he entered high school. Trying to escape a violent home life with an alcoholic father, Freese began staying with friends—including "some people I probably shouldn't have been hanging out with," he said.

By his junior year, Freese was struggling with his own addiction issues. He bounced between alternative schools, but didn't graduate from any; he tried rehab, but it didn't stick.

For the next few years, he wandered from city to city: Denver, Seattle, Honolulu, Saipan. By the time he landed in Vancouver, he had made the commitment to get sober, but hadn't found much direction past that.

All that changed after Sadie was born. "At first, it was like, 'Daddy's being clean,' but after a while I felt like, 'That's great, but what's Daddy going to *do*?' Freese recalled. "I don't want to be borderline poverty, like I grew up. I want to be a role model."

Freese enrolled at Clark College. At first, he found college daunting—less academically than logistically. "I didn't understand how registration worked," he said. "I had to use my resources. I had to ask for advice, and I'm not used to asking for advice. I'd be in the Financial Aid Office every day for a week, trying to figure things out."

But as Freese continued at Clark, he learned how to navigate its support systems. Advisors showed him how to plan his degree; he met friends while working out in the Fitness Center; he took advantage of other free and subsidized services like the Counseling and Health Center and the college's dental clinic. In the end, Freese graduated with honors, earning a cumulative GPA of 3.77.

Clark College President Bob Knight congratulates scholarship recipient Nicholas

Freese.

It hasn't always been easy. Freese had to balance his studies with caring for Sadie and volunteering in his community. He serves as a mentor to other recovering addicts, works on clean-up parties in his neighborhood, and participates in activities aimed at improving police-community relations. Additionally, he has worked during much of his time at Clark, though he credits his wife, Ashley, with keeping the family financially afloat while he pursues his education.

"She's paying the bills," he said. "She's working toward this just as much as I am."

Freese, now 28, plans to major in public affairs at WSUV, with the long-term goal of becoming a lawyer. "I want to be a voice for those who don't have a voice," he said. "I want to help people."

A first-generation college graduate, Freese said he hopes that sharing the story of his struggles and success will help to inspire others who might be facing their own challenges. "I want to show people in a similar case that this is possible," he said.

For Freese, earning this scholarship means that he will be able to concentrate on his studies at WSUV instead of on how to pay for them. But it also carries deeper meaning than the easing of financial burdens.

"What it means to me is that I'm there, I've reached that level," he said, raising his hand to about chest-height. "I'm not just getting an associate degree—I'm *doing well*."

And he knows just the little girl to celebrate that with.

# Building a Better Future

Keeley  
McConnell '16

You want to know Keeley McConnell's strategy for success, the thing that's helped her go from remedial math to high-level medical research? It's this: Stay focused on the path in front of you. One foot in front of the other. If you can make that next step, you can keep going.

Four years ago, the next step was: Get the kids in the car. Pack everything else in around them. Get the heck out of Dodge before your ex comes back.

Eighty miles later, McConnell and her three children arrived at a shelter for victims of domestic violence. She'd left her job, her home. She had no idea how she would support her family on the money she earned as a medical assistant. But one thing at a time. Find a place to live, get some stability.

It was only three months later, when McConnell had moved her family into an apartment, that she considered college. "When I was in high school, I never thought about college as an option," she says. "I'd taken one class when I was pregnant

with my son, but I tested into the lowest level of math they had and I thought, 'Oh my goodness, this is going to take forever!'"

However, a friend encouraged McConnell to come with her to apply to Clark College. Just as she'd feared, McConnell tested into DVED 21, the lowest-level math course offered at the time. But one thing at a time. Keep your eyes on the path.

McConnell's other strategy has been listening to advice from friends, family, and mentors. When an instructor suggested she enroll in Clark's Math Academy program, McConnell signed up. This yearlong program pairs standard classroom time with dedicated math labs, where students get extra help understanding difficult concepts. McConnell describes it as "the key to my success in math."

Keeley McConnell helping a student in Clark College's STEM Tutoring Center.

By the time McConnell finished her last Math Academy class, not only was she prepared to enter college-level math courses—she'd been recommended to become a math tutor herself. The experience helped boost her confidence and gave her the tools she needed to continue pursuing her dream of becoming a physician's assistant.

That goal would require her to spend two more years at Clark to earn an associate degree, plus another two at a four-year

institution to complete a bachelor's, followed by at least two years of medical school. *But*. One foot in front of the other. Stay focused on the path in front of you.

McConnell continued to thrive at Clark, finding she enjoyed the intellectual challenge of biology coursework. And once again, a mentor stepped in to change the course of her life. When biology chair Dr. Travis Kibota first approached her about applying to the BUILD EXIT0 Scholar Program, she was skeptical. Run by Portland State University in partnership with Oregon Health Sciences University, and with funding provided by the National Institutes of Health, the program helps undergraduates from diverse backgrounds become successful in health research careers.

"I was hesitant at first, because I wasn't originally interested in going into research," McConnell says. "But it's been the most amazing opportunity."

Through her participation in BUILD EXIT0, McConnell joined a cohort of students from community colleges in the region who formed a Research Learning Community. Within that RLC, she could learn about careers in research, develop skills, and connect with mentors. She also had a built-in social network to help her make the adjustment to a four-year institution after she graduated from Clark in spring 2016.

"If I had had to do all this without EXIT0, I would have been really overwhelmed," she says. "I knew everyone at Clark—staff, faculty, students. PSU was huge. But the EXIT0 staff have been there for me—you can go in and ask them anything."

Now a junior in her second semester at PSU, McConnell is deeply immersed in research in her chosen field of trauma medicine; she'll even see her name on some upcoming research papers, a big boost to career advancement in the research world. "I work with the Chief of Trauma at OHSU," she says

proudly. "I wear a pager; when a call comes in, I'm there, collecting data and samples."

McConnell says it was overwhelming when she first walked into OHSU. "I looked up and thought, 'I'm so close. I'm literally standing in the building I want to have my future in. It's what I've been waiting for my whole life.'"

Keeley McConnell, *left*, celebrates graduation from Clark College in 2016 with a friend.

She still faces challenges. While BUILD EXIT0 students receive a stipend that significantly eases the financial burden of being a college student, McConnell still works 30 hours a week outside of school to support herself and her three children, now ages 8, 9 and 18. And she struggles to find time to be present for her children as a mom.

"It's probably my biggest challenge right now," she says. "But they're great, they're my little drivers. I want them to have something better. They need to see that, when you want something and you work really hard at for it, you can get it."

McConnell brought her son with her earlier this year when she was invited to the Washington State Association of College Trustees' Transforming Lives Awards banquet, where they sat between Clark College President Bob Knight and two state senators. "I wanted him to experience that," she says. "But

once we were there, I realized how big a deal this was for me, too. With me, I get so focused on the road ahead, I don't spend much time thinking about the big picture. It made me realize, 'Oh, gosh, I guess I have come a long way.' And, you know, my kids and I—we're still moving forward."

***Are you a student interested in participating in BUILD EXIT0? The application deadline for the 2017-2018 year is February 28, and there is a free application help session on Friday, February 24, 10 a.m. – 11:50 a.m., in SHL 124.***

**After 20 years, a dream realized**

## 2016-2017 Community College Presidents' Scholarship in Honor of Val Ogden recipient Holly Varner

Holly Varner had always meant to go to college. She tried taking classes a couple times, but life as a Navy wife made it difficult—she was constantly having to move to follow her husband's 21-year-long career, not to mention taking care of three boys, now ages 8, 13, and 18. It was only when her husband retired and the family settled in Washougal that Varner could pursue her dream. She enrolled in Clark with just a GED and a handful of community-college classes on her transcript, determined to succeed academically.

During the 2016 Clark College Commencement ceremony, that determination paid off when Varner heard Clark College President Robert K. Knight announce that she was the recipient of the 2016-2017 Community College Presidents' Award in Honor of Val Ogden. The scholarship award provides full-time tuition at Washington State University Vancouver (WSUV) and is renewable for one additional year, essentially providing full

tuition to complete a bachelor's degree.

Holly Varner hugs her son after hearing that she has received two years of tuition to Washington State University Vancouver.

As soon as President Knight made the announcement, Varner stood and hugged her son, Jonathan, who had attended Clark alongside his mother through Washington State's Running Start program, which allows high school students to attend college tuition-free. The two had taken three classes together and even quizzed each other before exams.

"It was great to see him progress, to see him grow," said Varner.

Varner's own growth at Clark has been exceptional. She graduated with a 3.98 Grade Point Average ("I was so upset about that A-minus!") while managing multiple volunteer and extracurricular activities. Varner served as Vice President of Service for Alpha Sigma Phi, Clark College's chapter of the international honor society Phi Theta Kappa. In that role, Varner helped organize a Thanksgiving basket drive that provided holiday dinner supplies to more than 100 Clark College students and their families—negotiating an agreement with a new vendor that brought down the price of each basket that in turn allowed Alpha Sigma Phi to serve more students.

She also coordinated drives to provide books and art supplies to families in local homeless shelters. She interviewed more than 60 homeless individuals to learn what they needed most; based on those interviews, she developed a shoe and sock drive to help them.

“She is the go-to person if advisors, other officers, or administration have questions,” wrote Professor Ruth Trejo, who serves as Alpha Sigma Phi’s advisor. “We joke about her three-inch binder, where her sticky tabs have sticky tabs.”

Varner will begin studying at WSUV this fall. She intends to major social work and/or public health. Varner said that, while her family had educational funding available to them through the GI Bill, she needed to save that funding to help put her children through school. Receiving the Community College Presidents’ Scholarship will allow her to pursue her own education, hopefully to a master’s degree.

## **A smart investment**

Clark College student Cindy Nguyen hopes to become an ultrasound technician.

“I’ve always wanted to go to college,” says Clark student Cindy Nguyen. Even so—and despite her excellent grades—Nguyen acknowledges that college has its challenges.

“When you come to college, you need to learn to study more efficiently than you did in high school,” says the 19-year-old. “And there’s the money thing: tuition, and then textbooks are really expensive, like \$200 a quarter.”

Like almost three-quarters of Clark’s student body, Nguyen is a first-generation college student. Her mother, a nail technician, and her father, who installs hardwood flooring, never had the chance to attend college in their native Vietnam. Paying for college for their children (Nguyen’s older sister, who also attended Clark, is now a social worker, and her younger sister is still in middle school) is a financial challenge for them—but one they have decided is worth the sacrifice.

“They’re really supportive,” says Nguyen. “They’re willing to do anything for me to pursue my education, because they never had that opportunity.”

Being able to attend Clark has helped significantly in reducing the cost of college for the Nguyen family, who have lived in Vancouver since the 1990s. Nguyen is able to save on housing by staying with her parents while completing her prerequisites at Clark before transferring to a farther-away institution to complete her degree in ultrasound technology. Furthermore, she has received support from scholarships made possible by generous donors to the Clark College Foundation.

“That’s been really helpful,” she says. “It’s relieved the financial burden. Without the scholarships, I would have to get a job to support myself in college. This way, I can just concentrate on my studies. I’m so focused on what I’m doing.”

Every year, Clark College Foundation supports the college’s students with tens of thousands of dollars in scholarships, many of which are funded by Clark alumni who remember being struggling students themselves.

Nguyen says having total strangers investing in her education gives her a sense of responsibility to make that investment worthwhile. “It’s really motivating,” she says. “Their way of helping me has allowed me to enable myself, achieve an education, and hopefully support other people one day. I see myself working at a hospital and helping people as an ultrasound technician. That’s my dream. So what I’m learning right now, I’m going to give back to them—and I’m going to help support my parents, too.”

*Photo: Clark College/Jenny Shadley*
