

New for Fall

International students make new friends in the International Student Lounge on the first day of fall quarter. Fall 2013 marks record enrollment for International Programs.

On Monday, September 23, Clark College opened the doors for its 2013-2014 academic year. The college welcomed 13,373 students on opening day, down slightly from fall 2012, when the college welcomed 13,927 students.

The start of fall quarter is always a time of new beginnings at the college, but this year is seeing a number of changes to the way the college enhances student learning. Some highlights:

- **Expanded hours at CTC:** For the first time, Clark College at Columbia Tech Center will be open for credit classes on Fridays. The expanded schedule will make it easier

for residents of East Vancouver to complete their degrees entirely at CTC, without traveling to take classes on Clark's main campus.

- **Expansion into the Gorge:** In response to demand from local businesses and residents, Clark College is offering college-level classes to the communities of the Columbia River Gorge through its new satellite location in the Wind River Education Center in Carson. Until now, residents had to travel 20 miles or more to attend the nearest community college—and that college is located out of state, in Oregon.
- **New Phlebotomy program:** Clark College has redesigned its Phlebotomy certification program and relocated it to specially configured classrooms and labs on the campus of Washington State University Vancouver in the college's health care instruction building, which also houses the college's Nursing and Pharmacy Technician programs.
- **Bachelor's degrees in Health Informatics :** Clark College and Bellevue College have signed an articulation agreement that allows students at Clark to earn a bachelor's degree in Health Informatics Information Technology (HIIT) from Bellevue through online and remote classes—without leaving the Clark College campus. “In our ongoing conversations with regional employers, we realized there was a need for Health Informatics Information Technology professionals and responded quickly to that need, but we also realized that there would be a need for students to take their education to the next level,” said Debra Ortiz, director of allied health programs at Clark College.
- **Record number of Running Start and international students:** Clark expects to see more than 1,770 students enrolled in Washington state's popular Running Start program, which allows high school students to earn college credit for little or no cost. This number is a 5-percent increase over last year's Running Start

enrollment. Meanwhile, Clark is also seeing a record number of international students at the college this year. A total of 103 students from 31 different countries are attending the college this quarter.

- **Mechatronics offers evening classes:** Clark College's state-of-the-art Mechatronics program will begin offering evening course, allowing workers to retrain for modern industrial jobs without leaving their current positions. This expansion is designed to boost the region's economy; it was prompted by local businesses who wanted more opportunities to retrain their employees.

Food carts make their debut on campus.

- **New food carts serve campus while Culinary Arts program is on hiatus:** Clark is discontinuing its Culinary Arts – Food program while it launches an ambitious new redesign of the program that will make it more responsive to modern culinary trends. Three privately owned food carts are supplying food service to the college while the program is overhauled. The college's widely respected Culinary Arts – Bakery program will continue operating during this time.
- **Water-bottle filling stations:** Students and college administration have worked together to help preserve the environment by setting up water-bottle filling stations around the main campus, thereby reducing the number of

disposable plastic water bottles bought and discarded at the college.

A Regional Resource

Left to right, Associate Vice President of Corporate & Continuing Education Kevin Kussman, Vice President of Student Affairs Bill Belden and Vice President of Instruction Dr. Tim Cook meet with the residents of White Salmon to discuss potential course offerings in a satellite location.

As the economy of the Columbia River Gorge has developed, so have its needs for a more highly trained workforce. Recently members of two Gorge school districts reached out to Clark College to help meet those needs.

Representatives from Clark College recently attended two public meetings in the Columbia River Gorge to hear public input and gauge interest in offering college-level classes to the communities of Klickitat and Skamania counties. The public meetings were hosted by the Stevenson-Carson School District and the White Salmon Valley School District. Held at the Wind River Education Center in Carson and at the Columbia High School Library in White Salmon during February and March, the meetings were well attended by a cross-section of prospective students, business leaders, educators and economic development advocates.

More than 200 people attended the meeting in Carson, indicating the interest was there for college-level classes. Although there was a smaller number in attendance in White Salmon, the participants there clearly stated the need for educational programming to train for workforce needs, particularly for the growing high-tech sector in the Gorge. What Clark College officials still need to determine is how many and what types of classes to offer.

“Clark has explored the option of offering for-credit classes in the Gorge before, but we know that demands change with changing economic times,” said Clark College President Bob Knight. “We really needed to hear that the interest was there for a model that we could fiscally maintain and one that would be sustainable for the workforce needs of these communities.”

Columbia High School

principal Troy Whittle gives Clark College insight into the high school population in White Salmon.

Clark College is already offering adult basic education and ESL classes through the WorkSource offices in Stevenson and White Salmon and will continue those classes. The proposed expansion would bring general education offerings to the region—classes that would have broad appeal and that also could be taken by Running Start students.

“White Salmon Valley School District is excited about developing partnerships with Clark College and Stevenson-Carson School District for expanding college-level course opportunities that will better meet the growing needs of our students, adult learners, and communities,” said Dr. Jerry A. Lewis, Superintendent of White Salmon Valley School District.

Clark College may begin offering a limited number of classes this summer; the formal kickoff is scheduled for fall quarter in September. Classes in Skamania County will be offered at the Wind River Education Center, formerly the middle school for the Stevenson-Carson school district. A location for White Salmon classes is being discussed.
